Joel Molina-Reyes received the B.S.E.E. degree (magna cum laude) from the Universidad Veracruzana, Mexico, the M.Sc. degree in Microelectronics from the National Institute for Astrophysics, Optics and Electronics (INAOE), Mexico, and the Ph.D. in Advanced Applied Electronics from the Tokyo Institute of Technology, Tokyo, Japan. He is currently a Full Professor with INAOE. His research interests include the physics and technology of CMOS-compatible electron devices based on ultra-thin metal and high dielectric constant insulators for application in advanced logic, memory, sensing, MEMS, novel nanostructured materials and photoactive technologies. He has authored or co-authored over 80 peer-reviewed research publications.
